~~The present invention relates to a clamp for through-wall connection or a plug connector for through-wall connection having a locking element for attaching the clamp housing, which is made of insulating material, to a device or housing wall, this being insertable together with the locking element into an opening of a metallic device or housing wall and being clamped in the device or housing wall opening using a pivotable actuating wedge.~~

A clamp/plug connector for through-wall connection includes a clamp housing of an insulating material. A locking element is provided for attaching the clamp housing to a wall. A pivotable actuation wedge is connected as a single piece to the locking element.
